

COLUMBUS GA CONVENTION & TRADE CENTER

Policy: Display Vehicles in the Building

Many of our clients supplement their events by bringing in decorative or informational displays that include vehicles. Any vehicle in the building must be first approved by the event coordinator and placement of the vehicle must be agreed upon. Due to multiple consideration factors, including entry points and other events taking place in the building, approval is not guaranteed.

Once approved, all vehicles brought into the Trade Center must strictly adhere to the following requirements:

- Vehicles may not contain more than 1/4 tank of gas
- An absorbent mat and/or other appropriate collection device must be placed under the engine block and other area that leak fluids
- Display vehicles are only allowed in North, Center and South Halls
- Both battery terminals must be disconnected once the vehicle is in place and the gas cap must be taped by the Trade Center Staff
- All flammable and/or combustible liquids, such as engine oil and fuel stored in gas cans must be checked in with the Trade Center for proper documentation and storage.
